ABOUT ME

I am a hard worker and open to self-development. Being a software developer has been one of my goals for a long time. I have been training to be a developer by taking courses online for 1 year. You can see the projects I have done to improve myself on my github account.

There are courses that I actively attend, generally their content is Java. I am trying to improve myself as much as I can to become a Backend Developer.

EDUCATION

Istanbul Gelişim University

2015 - 2019

Audiology
